Product

Characteristics

Preparatory surface reinforcement for bonding with TwinBond products on supporting plates and concrete.

Use

- Apply to a clean, dry substrate (max. 18%) with a brush, roller or gun.
- Clean first if necessary with TwinBond Clean and/or TwinBond Foam.

Use at a minimum temperature of 5°C and RH < 85%. Drying time: 60 minutes.

Usage: 4 to 5 m² per litre, depending on the substrate.
