Product

Characteristics

Single-component polyurethane that dries in contact with air humidity. Excellent adhesion and high mechanical resistance. Resistant to moisture and chemicals.

Use

- Shake well for 2 min. and check for homogeneous black color.
- Apply to clean, dry wood (max. 18%) with a brush, roller or gun.
- Clean first if necessary with TwinBond Clean and/or TwinBond Foam.

Use at a minimum temperature of 5°C and RH < 85%. Drying time: 60 minutes.

Usage: 250-300 run. m per litre, depending on the substrate.

Since wood is a natural product with a variable composition, an adhesion test is advisable.
