

TwinBond TAB-110

Alu Black

AESTHETIC PROTECTIVE COATING FOR ALUMINIUM FRAMEWORK

Long open working time. Easy to apply with roller or spatula.

Technical Info

- Basis: 1K MS hybrid polymer.
- Hardening: hardening by reaction with air humidity.
- Consistency: paste.
- Colour: black/light grey.
- Processing temperature: between +5°C and +35°C.
- Temperature resistance: from -40°C to +90°C.
- Skin formation: > 30 minutes.
- Curing (in miter): <24h.
- Tensile strength: 1,5 MPa.
- Elongation at break: >350%.
- Shelf life: 12 months, kept cool and dry in original packaging.
- Safety measures: please consult the safety data sheet.

Packing

TwinBond TAB-110 Alu Black - pot 750ml

550328924

Product

Characteristics

This hybrid ms polymer adheres perfectly to aluminium, has a slow skin formation for comfortable work, a good filling capacity without dripping and residues are easy to remove.

Applications

Durable black coating for untreated aluminium.

Use

- Clean with TwinBond Clean and/or TwinBond Foam.
- Apply with a paint roller or putty knife.
- Remove any excess product with TwinBond Clean.
